

Clear Vu Flexible Swinging Doors

World Manufacturing (800) 722-3539

Technical Specifications:

- Available in .08 or .125 thick PVC material.
- Ideal for cooler or freezer applications as low as -20°F.
- PVC barriers provide energy savings by keeping cold air contained.
- Clear PVC provides complete visibility to the other side.
- Standard auto-closing Gravity hinges feature steel springs, steel fasteners, steel rods and roller-ball bearings with tension springs.
- Gravity hinges are also available in stainless steel and noncorrosive materials.
- Available 270° hinge systems available for easier swing, and larger loads by placing less stress on the PVC panels.
- The 270° hinge system mounts above the opening, providing several inches of additional clearance.

Features:

- Door panels swing 180° and open with less than a pound of pressure.
- Gravity hinge system ideal for openings as wide as 48" and as high as 84".
- Optional ABS Impact Plates ideal for pushcarts and heavier-traffic areas.
- Double-panel configurations allow easy walk-through access through the center opening.
- Longer lasting and easier to walk through than strip doors.
- Extends compressor life by maintaining adequate temperature control.
- Panels never drag over carried or pushed-through items.
- Panels do not stick together like strips and are not affected by moisture.
- Panels are custom-made to your specifications.

Shown with optional ABS Impact Plates

Warranty:

- 10-year rust-proof warranty on hinges.
- 90-day warranty from manufacturing defects (based on shipping date).
