

Gorilla Flexible PVC Swinging Doors

www.WorldManufacturing.com | Call (800) 722-3539

Technical Specifications:

- Available in .125 or .160 thick PVC material.
- Ideal for cooler or freezer applications as low as -20°F.
- PVC barriers provide energy savings by keeping cold air contained.
- Ideal for larger openings up to 120" wide and 144" high.
- Clear PVC provides complete visibility to the other side.
- Gorilla Gravity hinge made for large openings.
- Gorilla Gravity hinges feature steel tension springs, steel fasteners, steel rods and roller ball bearings.
- Gorilla Gravity hinges are also available in stainless steel.

Features:

- Door panels swing 180° and open with less than a pound of pressure.
- Gorilla Gravity hinge system ideal for openings as wide as 120" and as high as 144".
- Optional ABS Impact Plates ideal for pushcarts and heavier-traffic areas.
- Double-panel configurations allow easy walk-through access through the center opening.
- Longer lasting and easier to walk through than strip doors.
- Extends compressor life by maintaining adequate temperature control.
- Panels never drag over carried or pushed-through items.
- Panels do not stick together like strips and are not affected by moisture.
- Panels are custom-made to your specifications.

Warranty:

- 10-year rust-proof warranty on hinges.
- 90-day warranty from manufacturing defects (based on shipping date).

Shown with optional ABS Impact Plates.
